DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 12/14/2007, with respect to prior art rejection have been fully considered and are persuasive. The 103(a) rejection of claims 1-20 has been withdrawn.

Specifically, the applicant's arguments and evidence with respect to the term "pixel" has been considered and deemed persuasive. The prior art applied by the examiner discloses a blanket coating on a substrate surface, including multiple coatings and the examiner agrees that in light of the specification and the evidence supplied defining "pixel" as a term of art, such blanket coatings can not reasonably be considered comprising a plurality of pixels because a blanket coating of Schmidtt is not utilized and is not capable of being utilized in an electronic display as required by the term pixel and is not the smallest element in such a electronic display. Therefore the term pixel limits the scope of the claim to depositing a plurality of smallest addressable elements in an electronic display and the prior art applied by the examiner fails to read on this limitation.

The examiner disagrees with the applicant's arguments that a blanket coating is not a pattern, noting the applicant appears to be reading into the claim limitations that are not present. However, since the claims require a plurality of pixels, which ultimately requires a plurality of smallest elements in an electronic display or picture image and the prior art as applied by the examiner fails to disclose such a feature, such an argument is moot.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance: None of the prior art cited or reviewed by the examiner, alone or in combination, reasonably teaches or makes obvious depositing an organic material in a plurality of smallest elements in a electronic display or picture image using the technique as claimed with any degree of predictability or reasonable expectation of successfully providing such. Additionally, the claims are allowed over the applied prior art for at least the reasons set forth in the section 1 above and the applicants remarks date 12/14/07.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
